

The City of Unley Business Concierge Service

The City of Unley are working to developing stronger partnerships between businesses and Council, attracting new businesses to our City and strengthening and supporting our existing business precincts. This includes working with the growing number of home-based businesses operating across our City as well as traditional brick and mortar businesses.

We want to ensure business interactions with Council are as streamlined as possible and supported from start to finish.

As such, our newly established Business Concierge Service includes the following services:

- A single touch point to help navigate Council requirements
- Pre-consultation to avoid unexpected steps
- A dedicated staff member to assist and guide you in the process.
