

Norway Maple

Acer platanoides

Large Tree

Deciduous

Flowering: Yes

Colour

Upright tree with a broad round crown. Leaves that are quite deeply divided with smaller 'side teeth' between each lobe. Leaves change from green to orange- yellow before dropping in winter.

The flowers are yellowy green, blooming in early spring before the foliage emerges. These mature into double samaras made up of two winged seeds.

Prefers organic materials rich soil though will grow in most soil conditions, even compacted soils.
