

Golden Wattle

Acacia pycnantha

Small Tree

Native Evergreen

Flowering: Yes

Colour

The golden wattle is the floral emblem of Australia with its masses of sunshine yellow balls of flowers will brighten gardens in late winter through early spring. It is fast growing and has relatively short lifespan for trees of 15-30 years.

Adaptable to most free draining soils, and is tolerant of frost and dry periods.

Floral plumes are fragrant and can be used for making perfume.
