

# Honey Locust

## *Gleditsia triacanthos*

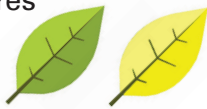

**Large Tree**

**Deciduous**

**Flowering: Yes**

**Colour**

Vase shaped open canopy and soft, weeping habit. Prefers well drained soils in full sun but is highly adaptable to a wide range of conditions.

Young foliage starts off a bright yellow colour and ripens to lime green. In winter large black seedpods hang from the branches.

Often chosen due to its vibrant colour and overall graceful appearance.
